

Safety Tip-August 2010

When riding the roads around your area, be aware of the middle of the road if you are on a two lane road, and if you are on a four lane road, keep an eye on the road as you cross back and forth between the passing lane and the slow lane.

I have noticed many crevices in the road between lanes that could swallow up a tire with no problem. Be aware of the road ahead of you when you pass someone.

A crevice is out there with your name on it.

Notice large crevice in the road. They are all over the place, be careful.

You may need one of these soon to ride on the roads today!
